

chemical application device/化学助剂装置 process flow/工艺流程

THE CHEMICAL SOLUTION BEING PREPARED IN THE TANKS (01) IS FED UNDER PRESSURE TO THE SPRAYING CHAMBER (05) BY MEANS OF THE PUMP (02). THE SPRAY/INJECTING NOZZLES (04) EVENLY APPLY THE CHEMICAL SOLUTION ON THE FIBRE BLEND IN PROCESS, WHICH IS PNEUMATICALLY TRANSFERRED INTO THE CHAMBER THROUGH THE FEEDING DUCT (03) AND HENCE TO THE EXIT, READY FOR THE FOLLOWING STEPS

在化学助剂备置罐(01)中已经准备好的化学助剂由压力泵(02)输送到喷射仓(05)的喷嘴(04)上,助剂将被均匀地喷撒在由喂料机构(03)输送的原料上,然后原料被转移至下一个工序
